

## The simple alternative for patients who struggle with donning circular-knit garments

CompreFLEX LITE now available in Beige and Black

### COMPREFLEX and COMPREFLEX LITE are 30–40mmHg short-stretch solutions for patients with:

- Edema of various etiologies
- Obesity, fragile skin, and limited mobility or grip strength
- Donning challenges and compliance issues
- A limb shape that is not conducive to traditional stockings
- Venous ulcers
- Moderate peripheral artery disease (PAD) requiring a low resting pressure garment
- Chronic venous insufficiency, requiring a high working pressure
- Lymphedema requiring day and night compression
- COMPREFLEX is ideal for patients requiring extra foot compression due to lymphedema or phlebolymphe

### High-quality features for extra comfort

COMPREFLEX LITE v. COMPREFLEX

Utilizes a breathable textile (Breath-O-Prene®)	✓	✓
Stretch panel for easy donning	✓	✓
Includes a pair of advanced ionized silver underliners	✓	✓
Strap extenders for large circumference customization	✓	✓
30–40mmHg COMPREBOOT for added foot and ankle compression		✓
Available in Black	✓	✓
Available in Beige	✓	

### New Premium Underliners

Our newest liners offer an advanced layer of protection between the skin and the CompreFLEX line of short stretch wraps.

COMPREFLEX LITE v. COMPREFLEX

Ionized silver technology prevents bacterial growth in the garment	✓	✓
Accommodates calves up to 33.5 inches	✓	✓
drirelease® technology to wick moisture and prevent odor	✓	✓
Soft, cushioned heel and toe and flat seams	✓	✓
Comes with Black 15mmHg foot compression liner (from base of toes to ankle)	✓	
Comes with Heathered Silver non-compressive liner		✓

### Why they're easy to don...

Straps roll back and secure to the garment while the stretch panel holds it in place

New Heathered Silver non-compressive protective underliner

J	22-26cm	22-26cm	≤30cm	≤30cm	≤33cm	≤33cm
K	14-18cm	19-23cm	18-20cm	23-25cm	20-22cm	25-27cm

**Measuring and fitting tips**

- Be sure to hold the measuring tape directly against the skin
- We recommend measurements be taken while the patient is standing
- Please note that the *center* of the ankle bone (lateral malleolus) is the 0 point
- When sizing the garment, ensure that the straps lay flat and overlap slightly, with no gapping
- 30-40mmHg active compression is achieved when the straps are tightened to be comfortably snug

**Precautions:**

- Moderate PAD
- Peripheral Neuropathy
- Chronic compensated congestive heart failure

**Contraindications:**

- Acute, decompensated congestive heart failure
- Acute, uncontrolled cellulitis
- Acute, untreated deep vein thrombosis (DVT)
- Severe PAD, ABI 0.5 and below
