This CME/CE activity might describe the off-label, investigational, or experimental use of medications and/or devices that may exceed their FDA-approved labeling. Physicians should consult the current manufacturers' prescribing information for these products. ACHL requires the speaker to disclose that a product is not labeled for the use under discussion.

Discussion of Off-Label, Investigational, or Experimental Drug Use: sirolimus, MEK inhibitors, sildenafil, tadalafil, truefill glue, and other medical therapies not currently approved for lymphatic malformations.
